RDock
How to install and compile

Peter Schmidtke

June 10, 2012

1 Introduction

1.1 Prerequisites

In order to be able to install RDock properly you need several pre-installed libraries or executables :

- gcc

- g++

- gettext (necessary for popt)

- popt (shipped with the RDock source code)

- cppunit (optional if you want to build the tests for RDock)
